PROJECTS

PORTFOLIO

HTML, CSS, JAVASCRIPT

- Developed a responsive portfolio website using HTML, CSS, and JavaScript, featuring interactive UI, smooth animations, and a structured layout to showcase projects, skills, and experience effectively.

SMART HELMET

ARDUINO, MICROPROCESSOR

- Developed an IoT-based smart helmet using ESP32 and multiple sensors (gas, temperature, pulse, ultrasonic, IR) to monitor miners' safety in real-time. Integrated the BLYNK app for live data tracking and alerts, enhancing workplace safety in hazardous environments.

EXPERIENCE

Avadhana Softtech

Full Stack Developer Intern – November 2025 - March 2025

Remote, Mumbai

As a Full Stack Intern at Avadhana Softtech, I developed responsive frontend interfaces while contributing to backend logic using Core Java and Python. I focused on seamless API integration and cross-browser compatibility, ensuring high-performance web solutions through clean code and agile collaboration.

Positive Quadrant Technologies

Full Stack Developer Intern – April 2025 - October 2025

Remote, Mumbai

I worked as a Full Stack Developer (PHP, Laravel) at Positive Quadrant Technologies LLP, where I contributed to the development of dynamic web applications and interactive modules. I was responsible for both front-end and back-end development, including feature implementation, bug fixing, and performance optimization. During this role, I gained strong experience in Laravel, database design, and modern development workflows, while enhancing my problem-solving and team collaboration skills.

CodSoft

Python Developer Intern – Feb 2024 – March 2024

Remote, Mumbai

I was assigned structured tasks aimed at enhancing my skills and understanding of real world applications. Successfully completed and submitted the projects, demonstrating a commitment to learning, adaptability, and the ability to deliver results within a set timeframe.

ADDITIONAL ACTIVITIES

- Volunteer at HariPrabodham Swaminarayan Sanstha
