PROJECTS

OPPORTUNET

Next.js—React, Gemini AI

- Developed a web platform to enhance career readiness. Features include AI- driven mock interviews, job application modules, and personalized learning through tailored courses. Built with react, Three.js, and Node.js, it offers seamless user and company interactions.

NETFLIX UI CLONE

HTML, CSS, Bootstrap

- Developed a responsive Netflix UI clone from scratch using HTML, CSS, and Bootstrap to enhance front-end development skills. Focused on replicating the design, layout, and responsiveness of the original platform.

ARDUINO CAR

ARDUINO, MICROPROCESSOR

- Developed a Bluetooth-control car using Arduino, enabling wireless operation via a mobile application, integrated motor drivers and sensors for smooth movement and precise control. Demonstrated proficiency in microcontroller programming and IOT-based project design.

EXPERIENCE

CodSoft

Python Intern

Remote, Mumbai

- I was assigned structured tasks aimed at enhancing my skills and understanding of real world applications. Successfully completed and submitted these projects, demonstrating a commitment to learning, adaptability, and the ability to deliver results within a set timeframe.

ADDITIONAL ACTIVITIES

- Participated in Be10x's AI tools and chatGPT workshop.
- Was a core member of Chakrawyuha (intercollege cultural event) and sub-head of the Creatives team for 2 years.
